What are groups?

Groups are a place where a specific group of people can easily be informed and communicate with each other.

Why should schools use groups?

There are many times when schools need to send information or communicate with a specific group of people, like parents or staff.

Managing this can be very time consuming. Hubbli not only makes it really easy to move people in and out of groups, but our groups support all forms of communication that schools need to manage i.e. notifications, newsletters, calendars, documents & media.

How do they work?

Hubbli groups are very similar to Facebook groups but they also have many additional features that are specific to school communications.

They are like a combination of Facebook, Google docs, Flickr, Survey Monkey... all the things we have learned that schools are using but in disparate tools.
